(54) AUTOMATIC ESTIMATE SETTling DEVICE

(57)Abstract:

PURPOSE: To obtain the automatic estimate settling device which improves operation efficiency and enables the unification and succession of procedures in a company by following a purchase procedure and an estimate settling procedure on a on-line basis.

CONSTITUTION: A reference setting device 3 structures a procedure information data base 1 which stores procedure information and a reference data base 2 which stores reference information on a settlement route, a settlement limit, an assessment reference value, etc. A purchase request procedure device 4 issues purchase request registration 41 and staffs of respective request departments who are in charge register purchase requests. The heads of the respective request departments judges whether the purchase requests displayed on the on-line basis should be approved or returned. A person in charge of purchase finally determines a suitable business connection on an estimate settlement procedure device 5. According to information on a settlement limit amount/ settlement tree stored in the data base 2, a settlement query to a person in a managerial position is automatically generated in the data base 1 and sent to the person in the managerial position on the on-line basis.

LEGAL STATUS

[Date of request for examination] 19.09.2000

[Date of sending the examiner's decision of rejection] 26.11.2002

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision]

of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
